Portfolio: <https://new-portfolio-mu-red.vercel.app>

Objective

Motivated Computer Science student specializing in software engineering, full-stack systems development, AI integration, and UI/UX architecture and game development. Seeking internship and entry-level software engineering opportunities where I can contribute to the design, development, and deployment of scalable software systems while continuing to grow under experienced engineering teams.

Education

University of Ghana

Bachelor of Science in Computer Science (Expected 2027)

GPA: 3.6/4.0

Relevant Coursework: Data Structures, Algorithms, Database Systems, Software Engineering

Technical Skills

Programming Languages: Python, JavaScript, TypeScript, C++, Java (Basic), C# (Basic), GDScript

Frameworks & Architecture: React, React Native, Progressive Web Apps (PWA), Multi-Tenant Architectures, Dynamic Routing

Databases: Supabase, PostgreSQL, MySQL

AI & Automation: LLM APIs, AI Integration, Voice Synthesis (ElevenLabs)

Development Areas: Full-Stack Systems Development, UI/UX Design, 2D Game Development, Systems Engineering

Tools & Platforms: Godot Engine, Git, GitLab, Figma, VS Code

Professional & Contract Experience

Sniris Website Deployment – Full-Stack Developer / Contractor

Technologies: Web Development, Frontend Engineering, Deployment

- Engineered and deployed the official production website for Sniris.
- Aligned backend functionality with responsive user interface components.
- Live Website: <https://www.sniris.com/>

Capital Business Group Web Infrastructure – Web Engineer / Contractor

Technologies: Web Development, Responsive Design, Component Architecture

- Developed and deployed the complete web platform for Capital Business Group.
- Focused on responsive design, optimized asset delivery, and modern component architecture.
- Live Website: <https://capital-businessgroup.com/>

Selected Projects

Project Lelouch – Multi-Tenant Hotel Management & Guest Platform

Technologies: React Native, TypeScript, Supabase, PostgreSQL

- Architected and developed a production-grade multi-tenant platform for hotel operations and guest experiences.
- Implemented branch-specific pricing, digital menus, emergency notifications, and WhatsApp concierge services through QR-based access points.
- Designed scalable structures supporting multiple business entities from a unified codebase.

Mind Mesh – AI-Powered Study Companion (PWA)

Technologies: React, PWA Architecture, AI Integration, Figma

- Developed an AI-assisted study platform featuring interactive flashcards and chatbot-powered learning support.
- Designed a minimalist user experience focused on student productivity and engagement.
- Produced MVP prototypes and user-flow architecture in Figma.
- UI design : [figma.com/design/NNIBfNyQbEuJL2J12PVZxa/mindmesh-prototype-MVp?node-id=0-1&p=f](https://www.figma.com/design/NNIBfNyQbEuJL2J12PVZxa/mindmesh-prototype-MVp?node-id=0-1&p=f)

Levi – AI-Powered Restaurant Assistant

Technologies: AI Integration, ElevenLabs, supabase, typescript

- Developed an AI assistant streamlining restaurant operations through reminders, purchase tracking, and analytics.
- Integrated ElevenLabs voice synthesis for natural conversational interaction.

UG Navigate – Campus Shortest Path Finder

Technologies: Algorithms, Pathfinding

- Developed a campus navigation application utilizing pathfinding algorithms to determine optimal walking routes.
- Applied algorithmic optimization principles to improve navigation efficiency.

Restaurant Management System

Technologies: React Native, Supabase

- Built a full-stack restaurant management solution featuring reporting systems, order workflows, and modern mobile user interfaces.

Aya – AI-Powered Store Assistant

Technologies: AI Integration, supabase, typescript, LLMs

- Developed an AI-driven platform assisting merchants with customer interactions, product inquiries, and order facilitation.

Anasesem Wear – Cultural Brand UI Design

Technologies: Figma, UI/UX Design

- Designed a modern e-commerce interface inspired by Ghanaian and African cultural aesthetics.
- Created responsive layouts and product presentation components balancing cultural identity with modern design principles.
- UI design: <https://www.figma.com/design/zbjNo6sksq03IQ1u6EThCR/RUI-product-card-design?node-id=58-176&t=sTJ4uDtsIRLtKaYB-0>

Experience

Merrylow Startup – Software Suite Contributor

- Contributed to software solutions serving restaurant operations and student services.
- Collaborated across the software development lifecycle including design, implementation, testing, and deployment.
- Gained exposure to engineering workflows, collaborative development, and scalable system design.
-
